YEN-TING WU

(FRANK)

PRODUCT & UI/UX DESIGNER · design + front-end

frankwu.dev frank.wu.0405@gmail.com +886 956 820 832 linkedin.com/in/frank-wu-a481b62a2 New Taipei City

PROFILE

Product designer who makes big choices feel easy: I find the structure in product ranges too large to compare, then design and code pages that guide shoppers to the right pick. Trained in user research at the University of Sydney; fully fluent in English and Chinese.

NT$3.31M
assisted revenue from three campaigns (GA4)

EXPERIENCE

Product & UI/UX Designer · Nitori Taiwan
10/2025 – Present

I own feature pages for nitori-net.tw from first sketch to live code, within the brand's guidelines.

- **Guided choice for big ranges.** The sofa guide asks about the room and household first, so the best few lead; the cupboard guide lets wall width rule out what won't fit before any product shows.
- **First care-kit sale in three years.** A reclining viewer gave shoppers a reason to buy a high-ticket sofa online, and a care kit priced against the sofa stopped feeling like a second purchase.
- **Campaigns that improved with each launch.** Mother's Day sold a feeling with nothing on sale (NT$1.17M in four weeks); Father's Day kept the story, added side-by-side specs and reached NT$1.67M in 17 days.
- **No more hand-edited product updates.** Pages render SKU, colour and price data from one structure (Data Island method, jQuery).

English Instructor · Lih-Jen International School
09/2024 – 07/2025

- Turned complex language concepts into step-by-step formats students could follow on their own.

Editor & Content Creator · Let's Talk in English
09/2023 – 12/2025

- Shaped subtitles and exercises so beginners could keep up, with educators and curriculum designers.

UNIVERSITY PROJECTS

One Shop · Fashion shopping app · solo designer and researcher
13 weeks

- Traced returns to low confidence in fit (20-person survey, interviews); think-aloud tests then reshaped the fitting room.

Smart Station · Trolley return system · team of two
02/2023 – 06/2023

- On-site tests drove three changes: private vouchers, a calmer animation, and no minigame slowing people down.

EDUCATION

Bachelor of Design Computing
University of Sydney
09/2020 – 01/2024

HCI, Design Thinking, User Research, Prototyping

Google UX Design Professional Certificate
Coursera
