YEN-TING WU

(FRANK)

PRODUCT & UI/UX DESIGNER · design + front-end

frankwu.dev frank.wu.0405@gmail.com +886 956 820 832 linkedin.com/in/frank-wu-a481b62a2 New Taipei City

PROFILE

Product designer who makes big choices feel easy: I find the structure in product ranges too large to compare, then design and code pages that guide shoppers to the right pick. Trained in user research at the University of Sydney; fully fluent in English and Chinese.

NT$3.31M
assisted revenue from three campaigns (GA4)

635
orders from those campaigns

1st
care-kit add-on sale in three years

EXPERIENCE

Product & UI/UX Designer · Nitori Taiwan

10/2025 – Present

I own feature pages for nitori-net.tw from first sketch to live code: UX, visual design and front end, within the brand's guidelines.

GUIDED CHOICE

Sofa guide
Asks about the room and household first, so the best few lead.

Kitchen cupboard guide
Wall width rules out what won't fit before any product shows.

Electric sofa guide
A reclining viewer plus a care kit priced against the sofa: the first care-kit sale in three years.

STORY-LED CAMPAIGNS · REVENUE

Father's Day kept Mother's Day's story and added side-by-side specs: **40% more revenue, in 17 days instead of four weeks.** Mid-Autumn had the best conversion, 1.19%.

FRONT END

Pages render SKU, colour and price data from one structure (Data Island method, jQuery), so product updates go live without hand-editing pages.

BEFORE DESIGN · TEACHING AND EDITING

English Instructor

Lih-Jen International School · 09/2024 – 07/2025

Turned complex language concepts into step-by-step formats students could follow alone.

Editor & Content Creator

Let's Talk in English · 09/2023 – 12/2025

Shaped subtitles and exercises so beginners could keep up, with educators and curriculum designers.

UNIVERSITY PROJECTS

One Shop

Fashion app · solo designer and researcher · 13 weeks

Traced returns to low confidence in fit (20-person survey, interviews); think-aloud tests then reshaped the fitting room.

Smart Station

Trolley return system · team of two · 2023

On-site tests drove three changes: private vouchers, a calmer animation, and no minigame slowing people down.

HOW I WORK

01 Sort the range
Group the SKUs with AI help; find what shoppers compare.

02 Choose the story
Story, scenario, look, purpose or customisation.

03 Design and build
From Figma to production code.

04 Measure and repeat
Carry each lesson into the next launch.

EDUCATION

Bachelor of Design Computing

University of Sydney · 09/2020 – 01/2024

Google UX Design Professional Certificate

Coursera

SKILLS

DESIGN
Figma, Adobe Creative Suite, wireframing, prototyping

RESEARCH
Usability testing, interviews, journey mapping

FRONT END
HTML, CSS, JavaScript, jQuery

COMMERCE
Cross-selling UX, SEO

LANGUAGES

English
TOEFL 108 · IELTS 7.5
